

1-Pc. and 3-Pc. Polypropylene Bolted Ball Valves

Fiberglass-reinforced bolted valves for heavy-duty industrial applications. PTFE seats allow free movement of self-aligning, diamond-tuned polypropylene ball for precise alignment. Self-lubricating PTFE stem, bushings, and ball seats won't stick or bind. With FKM seals. FNPT connections. For use in fluid-handling applications with fertilizer, herbicides, and insecticides, as well as with industrial acids, solvents, liquid waste, wastewater, and cooling water.

2-WAY

- Max. temp.: 150°F
- 3-pc. valve structure

3-WAY

- Max. pressure: 100 psi
- Temp. range: -20° to 150°F
- 1-pc. valve structure

Full port, right or left directional flow valves. Bottom-load valves can be turned off to stop flow. Side-load valves cannot be turned off.

Actuated Ball Valves

- Valve temp. range: -20° to 400°F

Compact, direct-mount valves provide accurate alignment. Anticorrosive coating. RTFE seats. 3-way models are ideal for diverter-type applications; 3-pc. models permit easy in-line maintenance. All valves have NEMA 4X enclosures.

PNEUMATIC

- Actuator inlet pressure: 80 psi or greater
- Actuator temp. range: -4° to 176°F

Excellent for continuous rapid cycling or hazardous conditions. Hard anodized aluminum housing. Integral 120VAC, 60 Hz, NAMUR-mount solenoid with three 1/4" NPT ports.

ELECTRONIC

- Actuator temp. range: -15° to 140°F
- Feature reversible motors, terminal strip, manual override, and a hardened precision gear train. 1/2" to 2" can be wired in parallel. 50% duty cycle. 3" have 2 extra SPDT limit switches, 30% duty cycle. General cycle times: 2 1/2 sec. for 1/2" to 1"; 6 1/2 to 15 sec. for 2"; 15 to 22 sec. for 3". The 12-24VAC/VDC models do not have a manual override.

SOLENOID AIR CONTROL VALVES

Standard NAMUR direct-mounted pilot solenoids can provide electronic control of the inlet air. Solenoids efficiently pressurize and exhaust the pneumatic actuator piston compartments allowing the actuator to cycle.
