Prison and Ligature-Resistant Toilet and Sink Combination Units

■ For institutional showerheads, go to Grainger.com

Ligature-resistant sinks, toilets, and urinals withstand damage and prevent vandalism, abuse, or potential for self-harm or suicide in correctional and mental health facilities where antiligature or security products are needed. Sinks have push-button controls that provide hot and cold water at 0.5 gpm, and a penal bubbler. Metering valves can be set for 5- to 60-sec. operation and cannot be held open. These specialized toilets and urinals include enclosed flush valves, so they can't be used to tie off cords or fabric strips.

Ligature Resistant Bathroom Faucets

Cone-spout faucets are shaped like a rounded triangle, or cone. Their shape makes it difficult to use the faucets as a ligature point or a point of self-harm, making them suitable for hospitals, prisons, and mental health settings. These dual-metering-handle two-hole centerset deck-mount faucets have two handles that users push down on to start the flow of water. Each handle is operated separately to control the hot and cold water supplies. Metering-handle faucets let users control the start of the flow of water but not the duration, as the water flow shuts off automatically. Chrome faucet finish.
