

Stainless Steel Pipe & Pipe Nipples, Schedule 40 & 80

▪ MNPT connection

Type 304 stainless steel resists corrosion caused by water, heat, saltwater, acids, minerals, and peaty soils. Pipe connects with fittings to transport air, water, natural gas, steam, and chemicals to storage tanks and in residential plumbing, and kitchen and food applications. **Type 316 stainless steel** has a higher nickel content than 304 stainless for greater corrosion resistance from

caustic chemicals, corrosive fluids, oils, and gases, and withstands pressure and high temperatures. Pipe connects with fittings to transport air, water, natural gas, steam and chemicals in chemical manufacturing, industrial and chemical transportation, and food production and processing.

SCHEDULE 40: Low-pressure (100-299 psi). For air, natural gas, propane, steam, and water applications.
