Bathroom Exhaust Fans with Heater

■ 120V

Feature a built-in heater that warms the air that passes through the fans to make chilly bathrooms more comfortable. They can help dry out bathrooms faster than fans without a heater. Fans connect to ductwork to pull stagnant air, odors, and some moisture out of bathrooms to help prevent mirrors and windows from fogging and to reduce mold and mildew growth.

UV-Disinfecting Bathroom Exhaust Fan with Light

■ 120V

Provide UV lighting to kill bacteria and standard LED lighting to illuminate the space. The UV light source turns on when the bathroom is unoccupied to reduce viruses, mold, and bacteria on surfaces. The LED light provides task lighting when the bathroom is occupied. Fans connect to ductwork to pull stagnant air, odors, and some moisture out of bathrooms.

Ductless Bathroom Fan

■ 120V

Has a charcoal filter that neutralizes nuisance odors in the air that passes through the fan. Model recirculates the filtered air to freshen the air in the bathroom and does not connect to ductwork.
