**Air Handler®****Non-Pleated Panel Air Filters**

- Chipboard frame; polyester filters have metal grid on one side
- UL Classified

Tackifier on upstream side improves particulate capture while polyester filters do not shed fibers. All filters are commonly used in furnace and central air systems in residential and commercial buildings where basic filtration is required.

**Air Handler® Washable Electrostatic Air Filters**

- MERV 5
- Polypropylene media
- Aluminum frame
- UL Classified

Filters naturally create a static charge as air moves through the filter, and the charge attracts tiny particles such as dust and pet dander. They can be washed and reused, which eliminates the hassle and expense of purchasing and storing replacement filters. Permanent, fit into existing filter tracks, and have an arrestance rate of 90%.

**Air Handler® Fan Shroud Air Filters**

- MERV 4
- Polyester media

Fit over standard guards on air circulator fans to filter the air before it enters the fan. Also known as circular fan filters, they trap large airborne particles from the air stream to prevent them from building up on the fan blades. Elastic gathering band and hook-and-loop closure.

Fits Fan Guard Dia.	Case Qty.	Item No.
