

## Portable Humidifiers

Add moisture to air in a single room to make the space feel warmer, minimize static shocks, and help prevent wood surfaces from drying out. Suitable for use in offices, homes, and other indoor spaces.

**Evaporative Humidifiers**—Have an internal fan that draws in air and passes it through a moist wick to increase humidity.

**Steam Humidifiers**—Use electrodes to create steam and use less water than evaporative humidifiers and bypass humidifiers.

**Ultrasonic Humidifiers**—Vaporize water and release the vapor into the surrounding air. Create less noise than evaporative humidifiers.

## Industrial Dehumidifiers

Durable units provide higher water-removal capacity than office dehumidifiers making them ideal for water-damage remediation jobs and for drying the air in warehouses, storage facilities, museums, and similar large indoor spaces. Metal housing.

## Industrial Dehumidifiers with Hour Meter

Feature an hour meter that tracks how long dehumidifier is in use on a jobsite for billing purposes. Ideal for water-damage remediation jobs where large amounts of water need to be extracted from the air, floors, and walls. Plastic housing.

## Compact Industrial Dehumidifiers with Hour Meter

Fit into crawl spaces, basements, other tight areas, and have an hour meter that tracks how long unit is in use on a jobsite for billing purposes. Multiple units can be stacked for more drying capacity. Plastic housing; Wi-Fi and Bluetooth capable. Suitable for water-damage remediation jobs where large amounts of water need to be extracted from the air, floors, and walls.
