## Nonventilated Roof Curbs

■ For insulated and noninsulated metal, concrete, or wood roof decks  
 ■ For rubber membrane and urethane foam roofing materials

Straight-sided, prefabricated, leak-proof curbs provide compatibility between ventilator, curb, and roof opening on commercial and industrial buildings. Most include 1" insulation and integral damper tray. Curbs are for flat roof decks with up to 6" of insulation. Roll-formed with 18-ga. galvanized steel and 1 welded side for added strength. Fixed curbs include a 1½" lap-joint wood nailer. Adjustable curbs are shipped unassembled.
