Cablofil Wire Mesh Cable Trays

- Lightweight steel

Mesh cable trays allows air to flow through to keep cable ventilated and cool. Also known as basket trays, wire mesh trays may be cut or bent in configurations like curves, slopes, and tees to accommodate complex cable runs. Trays mount on walls, overhead, or under floors in whole-facility installations, and they're ideal for hiding cable in spaces without paneled ceilings.

Cable Ladder Trays

- 4" load depth
- 5/4" side rail height

Rigid aluminum trays have high load capacity and resist stress, camber, and warping. Flange-out side rails ease cable installation. Splice plates are slightly curved, for a spring-fit on straight sections or contour-fit on fittings. Meet NEMA VE1. Include splice plates and mounting hardware.
