POWER BREEZER

Portable Misting Coolers

- 85-gal. water capacity
- Oscillating head
- Integrated water tank

Circulate atomized water vapor that mixes with surrounding air to cool and humidify it. Coolers help regulate temperatures to protect workers from heat stress and reduce the risk of damage to machinery and products. They require no filters, no connection to ductwork, and have a large tank that supplies water for spot-cooling indoor production lines and warehouses or outdoor sporting events and festivals. Locking casters ease maneuverability from room to room. Optional ducting 55MU73 helps direct cooling mist to specific areas where it's needed.
