**Paint Collector
 Air Filter Pads**

■ Can be cut to size

Filter media captures dust and particles in the paint booth's air stream and traps paint overspray to keep it from clogging the booth's fans, ducts, and motors or entering the surrounding air. Constructed of a non-pleated filter media that can be cut to fit a compatible air filter frame. Allows users to replace spent filter media without the expense of replacing the whole filter assembly. They are commonly used in the automotive and manufacturing industries.

**Air Handler®
 Spray Booth Make-Up Air
 Ring Panel Air Filters**

■ UL Classified

This 2-ply synthetic media is heat-sealed inside polyester layers, creating a self-gasketing filter with internal metal wire. Unlike standard panel air filters, ring panel air filters don't require clips or latches to seal them in place.

**Air Handler®
 Paint Collector Air Filter Rolls**

Designed to capture dust and particles in the paint booth's air stream and trap paint overspray to keep it from clogging the booth's fans, ducts, and motors or entering the surrounding air. Constructed of non-pleated filter media in long lengths that can be cut to fit a compatible air filter frame. Allows users to replace spent filter media without the expense of replacing the whole filter assembly. They are commonly used in the automotive and manufacturing industries.

Green Masking Paper

■ 40-lb. paper weight

Disposable paper helps protect the walls and floors of spray booths and parts of objects being painted from paint overspray. Prevents paint buildup and ensures booths remain clean, free of paint that could be tracked out, and ready for new items to spray.
