

Portable Pedestal & Tower Electric **Office Heaters**

These heaters take up little floor space and are typically placed in office spaces and reception areas. Units use fan-forced heating.

Portable Radiator-Style Electric Office Heaters

Heating element is contained in an oil-filled radiator to provide consistent warmth and to give off residual heat even after the unit is shut off. Heaters use convection-style heating and don't have moving parts, so they operate quietly. Units have tip-over switches and will shut off automatically if knocked over.
