Indoor Suspended Infrared Radiant Electric Ceiling Heaters

Units use infrared radiant heating to quietly warm people and objects, not the ambient air, without taking up floor or wall space. Suspend from the ceiling to spot-heat areas in workshops, garages, and warehouses. May only be used indoors.

Indoor/Outdoor Suspended Infrared Radiant Electric Wall Heaters Solaira®

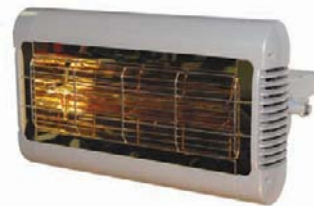

- Beam pattern: 45°

Can withstand rain and are typically used to spot heat spaces like condominium terraces, gazebos, under patio umbrellas, and other low-clearance seating areas. Units use infrared radiant heating to quietly warm people and objects, not the air. Included bracket allows for vertical and horizontal orientation.
