Direct-Fired Portable Gas Torpedo Heaters

These heaters are used as the primary source of heat in ventilated enclosed spaces or in open spaces, like jobsites and construction sites. Heaters have an open flame that directly heats the air to warm a space.

Dyna-Glo® Portable Gas Radiant Cabinet Heater

■ Propane

Heater uses infrared radiant heating, which is absorbed by people and objects to warm them faster and more efficiently than convection heaters. It's placed on the floor and provides directional supplemental heat to small areas like garages.

Heating Capacity Output	Heating Area	Fuel Consumption	Min. Cylinder Size	Overall Height	Overall Width	Overall Depth	Mr. Model	Item No.
