

1-800-GRAINGER (472-4643)

Watertight Devices

Corrosion-resistant devices are suitable for dust-laden, damp, or wet (IP66) environments, including temporary submersion (IP67). Rated NEMA 4, 4X, 6, and 6P. UL Listed and CSA Certified.

HUBBELL®

Plugs and connectors feature keyed interior for easy installation and high conductivity brass termination. Also designed with Gotcha® ring and collapsible bushing strain relief. The strain relief nut seals on the body, eliminating areas of debris collection, and provides impact resistance. Unique cone

seal prevents dirt and debris from collecting at cable entrance and adjusts to various cable ranges. All stainless steel hardware and corrosion-resistant connection points.

ERICSON®

Designed with antimicrobial additives, these watertight devices provide continual, long-lasting protection against the growth of bacteria, mold, mildew, and fungi. These NSF/UL/CSA rated wiring devices can be used for new and existing installations, and are suitable for a wide range of applications.
