Butane-Powered Soldering Irons

Provide rapid heat from non-toxic butane fuel and without the need for batteries or electricity.

2-in-1 Butane Soldering Irons—Tools can be used with compatible tips for use as a soldering iron or flameless heat tool. Applications include heat-shrink wrapping, desoldering surface-mount components, and soldering large items.

3-in-1 Butane Soldering Irons—These tools are used with compatible tips for use as a soldering iron, flameless heat tool, or open-flame torch. Suitable for use in soldering and desoldering, removing surface-mount components, and in heat-shrink tubing applications.

Cordless Soldering Irons

Soldering irons are powered by disposable alkaline batteries or rechargeable internal batteries. They are commonly used for splicing wires and smaller-scale repairs where a dedicated power supply is not available.

Power Consumption (Maximum)	Operating Temperature (Maximum)	Tip Type	Temperature Adjustment	Battery Type	Mfr. Model	Item No.
Cordless Soldering Iron Kit						
4.5 W	860 °F	Conical	Fixed	(3) AA – Included	WL1BA4	787C24
