

Bulb Eaters and Lamp Crushing Systems and Accessories

Units safely crush fluorescent lamps into 100% recyclable material. Activated carbon and dust filters capture and neutralize over 99.99% of mercury vapors released in the process. Systems include one straight lamp tube, filter combo kit, spinner assembly, and carbon filter. 20VR90 accepts all fluorescent lamps when 20VR91 is added.

Notes: Use and recycling of the crushed lamps is regulated by the EPA. Not available in CA, CT, ME, MN, MO, NH, PA, RI, VT, WV. Permits required in NJ and MI; application required in TX and VA.

Lamps must be crushed in building where used.

Lamp Changers

- Order bulb changer and pole separately

Change high and hard-to-reach lamps without using ladders. To determine proper selection, match lamp changer with lamp type.

Battery Recycling

Battery recycling products help users comply with regulations for recycling batteries, which may contain hazardous materials. **Prepaid recycling and disposal kits** come with containers, preprinted shipping labels, and shipping instructions for recycling specific types of batteries. Prepaid shipping fees and recycling costs are included with the kits, and a certificate of reclamation is available upon request. **Recycling tubes for standard batteries** can be placed in high-traffic areas such as copy rooms and supply rooms to collect dead batteries for recycling.
