24J895 Wash Bottles

Narı

No

2

LDPE bottles with polypropylene caps Integrated spout squeeze bottles

provide guick, handy cleanout of laboratory glassware and plasticware. Printed bottles save time and help eliminate cross-contamination.

Cap

No

Wide-Mouth 6FAU7 Spout Style

Items beginning with "24J" are printed with chemical name and formula. Chemical Abstract Service number, and NFPA warning diamond for easy identification and safety compliance.

Note: Labware imprinting indicates imprinting on bottle, cap color, or write-on label

Clo

Grad. Disp. Bottle * Locking top.

Automatic dispensers operate one-handed without removing the lid. Imprinted units are labeled in nonsmearing ink with one of the three most commonly used chemical names.

One-Touch and Take-Along dispensers allow cotton or pad application, with excess fluid seeping back into the bottle.

Pure-Touch and Pure-Take

dispensers reduce backflow risk with raised purity protector to keep fluid supply contaminant-free. Pure-Touch units reduce vapor escape; for use with noncotton brushes.

ESD (electrostatic dissipation) bottles are made of durAstatic HDPE and embossed with the ESD protective symbol for fast identification.
