## Ultrasonic Cleaners

Inaudible ultrasonic vibrations safely clean metal and plastic instruments, machinery, and parts. Size, timing, and heat options are available for a variety of industrial and laboratory cleaning tasks, and models include a cover.

Note: Operation requires a basket or tray for both Branson and Elma Ultrasonics models, sold separately. Search on "Branson Baskets" or "Branson Trays" or "Baskets for Elma Ultrasonics" on Grainger.com.

## Ultrasonic Cleaning Concentrates

Designed for maximum effectiveness with ultrasonic cleaners.

**Metal Cleaners**—Metal 1 works on copper, brass, and steel substrates. Removes cutting and polishing oils and makes soils easy to remove.

Metal 2 and 3 work on ferrous metals, copper, and stainless steel, plus alloys of copper, steel, and titanium. Metal 3 acts as an emulsifier to prevent soil from redepositing.

**General Purpose Cleaner**—Removes soils, fingerprints, dust, light oils, and greases.

**Industrial Strength Cleaner**—Removes grease, oils, and particulates from mechanical components. Cleans shop oils and light carbon deposits from valves and fittings.

**Alconox Detergents**—Concentrated formula removes soil, grease, oils, solvents, chemicals, blood, and tissue. Use on glass, metals, ceramics, plastic, and fiberglass.

**Citranox Detergents**—Contain acid ingredients for removing scale, metal oxides, salts, and inorganic residues. Phosphate-free.
