

LAB SUPPLIES

Flasks, Carboys, Funnels & Specimen Containers

Scan. Order. Done.
Details on page A1.

Flasks

Designed for safely making solutions in laboratory environments; allowing liquid solutions to be collected and contained for samples from various reactions due to heating, cooling, dissolving, and boiling.

Carboys

Glass—Neck is fabricated for a uniform fit with a #12 rubber stopper.

Plastic—Top handles provide easier transport and pouring. Spigot models allow for easy liquid dispensing.

Buchner Porcelain Funnels

Funnels have heavy wall stems with a sealed-in porcelain fritted disc and is beaded at the top for additional strength. Not recommended for use where pressure would exceed 15 psi.

Cap.	Funnel Top I.D.	H	Stem L	Mfr. Model	Item No.

Separatory Plastic Funnels

Short stemmed funnels feature a narrow stem mouth. Designed to decant two immiscible fluids into containers with small openings, reducing spillage.
