

1-800-GRAINGER (472-4643)

Corded Pistol-Grip Drills

- 120V AC
- Variable speed reversing trigger switch

These corded drills provide ergonomic handling for a range of positions on vertical and horizontal surfaces. Pistol-grip positioning keeps the tool steady and controls pressure during drilling and driving.

Corded Right-Angle Drills

- Reversing
- Keyed chuck
- Variable speed
- Continuous speed
- 3/8" drill capacity in steel
- 120V AC
- Paddle switch

A bit-holding chuck oriented 90° to the tool body creates a slim profile for accessing corners and reaching into tight spaces.

Corded Joist & Stud Right-Angle Drills

- 1/2" chuck
- 2 speed settings
- 1/2" drilling capacity in steel
- 120V AC

These two-handed, high-torque drills drive wide drill bits and hole-saw attachments to make large holes for running duct, pipe, and wiring through framing and flooring. Users hold them at waist level and lean into them to increase drilling force. The chuck is oriented 90° to the tool body, so they have a slim profile for accessing corners or narrow spaces.

Corded Spade-Grip Drills

- Trigger throttle

Additional handles provide maximum control and allow users to apply extra force. These drills use wide, long bits to bore large holes in timber or to mix mud or plaster.
