Details on page A1.

## PACKOUT Modular Tool Storage System

**Totes, Carts & Tool Boxes**—Interchangeable components from the Milwaukee PACKOUT system stack and lock in place to create mobile storage units. A rolling tool box, hand truck, or dolly forms the base and eases transport between locations. Add tool boxes, organizers, and totes to customize the system.

**Socket Sets**—Include sockets in a range of sizes, extensions, a ratcheting drive tool, and an organizer box for storage. The box base snaps onto the cross brace of a PACKOUT hand truck or the top of other PACKOUT components.

**Accessories**—Weather-resistant jobsite radio provides music or news for work crew. Includes

ports to charge mobile devices and Milwaukee M18 batteries. Impact-resistant personal cooler stores and chills food and beverages.

**System Components**—Mounting plates and wall mount racks secure to flat surfaces to provide a dedicated space to store modular system components. Foam inserts cushion tools in tool boxes, and dividers can be configured to customize the drawer layout. Organizer trays hold small objects to prevent them from rolling around and getting lost inside a tool box or bag. Workstation tops provide a smooth, impact-resistant surface for completing assembly work and paperwork.
