**VISE-GRIP** Milwaukee

**WESTWARD**

## Locking Pliers Sets

These pliers can fix their curved jaws like a vise onto pipe and round stock for a better grip than flat jaws. Sets provide a specific assortment of pliers without the hassle of selecting individual tools.

## Locking Pliers

Tools can fix their jaws like a vise onto objects and materials, providing a secure hold to grip, turn, and clamp.

**Angled Long-Nose**—Have an angled head and long nose for better visibility of workpieces and better access to tight spaces compared to straight, short-nose pliers.

**Curved-Jaw**—The jaws conform to pipe and round stock for a better grip than flat-jaw pliers.

**Flat-Jaw**—Make full contact with level surfaces and grip flat, square, and hex-shaped materials.

**Long-Nose**—The long, straight nose can reach into tight spaces and provide a precise grip.

**V-Jaw**—Can wrap onto 3 sides of hex-head fasteners; provide a firm grip to prevent slipping and marring.

## Retaining-Ring Pliers Sets

These pliers can install and remove snap rings that fit into a bore (**Internal Ring**) or onto a shaft (**External Ring**). **Convertible** pliers can switch their jaw motion or orientation to accommodate an internal or external snap ring. These pliers sets provide a specific assortment of pliers without the hassle of selecting individual tools.
