Wire & Cable Strippers

Tools can properly strip wire and cable, ensuring reliable connectivity and signal transmission.

Electrical Wire Strippers have slots in the jaws to match specific electrical wire gauges.

End-Style Wire Strippers with Adjustable Cutting Depth ideal for stripping large quantities of the same wire gauge; can reach into tight spaces.

Grip and Strip Wire Strippers can cut and pull off insulation in a single motion.

Precision Grip and Strip Wire Strippers can score, grip, and strip tough, hard-to-remove insulation.

Voltage-Sensing Electrical Wire Strippers detect voltage hazards; help prevent electrical shocks when working near electrical components.

Multifunction Wire Strippers remove insulation and can crimp, cut, and loop.

Electrical Cable Strippers can clamp onto the cable and slice through the jacket as the tool is rotated around the cable.

Data and Coaxial Cable Strippers clamp onto a cable and slice through the jacket while tool is rotated around the cable.

Wire-Stripping Knives cut through wire, separate joined wire strands, and slice off insulation.
