## Drain Cleaning Accessories

Tools assist with the operation and transport of drain guns, augers, and machines. **Autofeed Assemblies** automatically feed drain cleaning cable into pipe and back into the machine to ease operation and clear lines faster than manual feeding. **Cable Baskets** keep sectional machine cable contained for transport to jobsites and storage when not in use. **Cable Guides** direct cable from a drain cleaning machine and into pipe to reduce splatter and prevent cable from twisting or kinking. **Carrying Straps and Cases** ease storage and transport of compatible drain cleaning machines. **Drums** can replace broken drain cable drums or provide a second drum to hold a different cable size. **Drain Cleaning Gloves and Mitts** help maintain grip and protect hands from abrasions while feeding and retracting cables. The mitts are covered with metal studs that improve grip on sectional machine cables.
