

### Tongue and Groove Pliers

- Hardened steel
- Corrosion-resistant

**Channellock**—Undercut tongue-and-groove design assures strong no-slip jaw action. Laser heat-treated right-angle teeth for greater durability. GripLock jaw design accommodates many shapes.

**Westward**—Full polish and clear lacquering coating process provides corrosion resistance.

**Knipex**—Cobra pliers are self-gripping and feature high-leverage design. Feature push-button that locks adjustment position.

**Milwaukee**—Reaming head design for up to 2" pipe. Forged alloy steel and induction hardened jaws. Smooth transition grips and rust protection.
