Rotary Laser Levels

All kits include batteries, instruction manual, and carrying case.

LEVELING TYPES

Horizontal or Vertical Leveling: Rotary lasers that include vertical leveling can be rotated onto their side for vertical alignment and plumb applications.

Electronic and Pendulum Self-Leveling: More accurate results than manual lasers, and have an out-of-level indicator or alarm.

Manual-Leveling: External leveling screws and level vials are used to manually level the laser.

BEAM COLORS

Red Laser Beams: Cost effective and ideal for indoor use, most visible in low light situations.

Green Laser Beams: More visible than red beams, particularly in brighter light situations.
