Rivet Tools

These tools can set rivets to join sheet metal, plastic sheets, fabrics, and other thin materials.

Solid and Tubular—Have C-shaped jaws that place a die on each side of material being joined and squeeze a solid or tubular rivet between the dies to compress and set the rivet. Tools accept different die sets to match specific rivet sizes and head types.

Blind—Can install rivets and join parts where the back side of the parts can't be easily accessed.

Tubular—These rod-shaped setting tools allow the installation of tubular or semi-tubular rivets with a tap of a hammer.

Fits Rivet Dia.	For Maximum Rivet Length	For Rivet Material	Overall Length	Includes Squeezer Dies	Brand	Item No.
