

Tether-Ready Tools

When working at heights, it's imperative to secure hand tools to a fixed point to prevent injuries caused by dropping. Proto® SkyHook™ Tether and Transfer systems provide positive control of hand tools at height, secure tool transfers, and a free range of motion. SkyHook™ switch connector tethers to the tool on a short lanyard and is compatible with screw-gate carabiners. Allows hands-free tool transfer. SkyDock™ attachment anchors SkyHook connector to the wrist, belt, apron, or station. Tools can be tethered with shrink loops, tool collars, lanyards, or bungees for use with the system.

Easy hands-free tool transfer

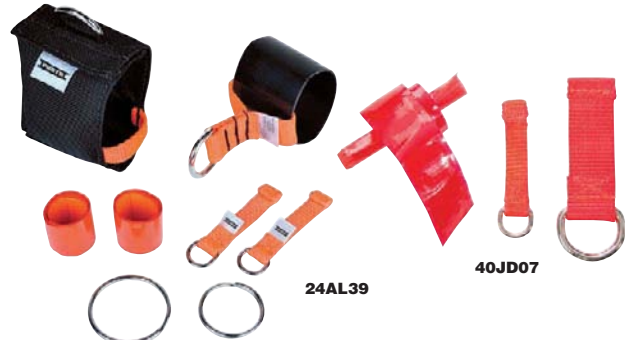

Keep tools securely connected to wrist or belt

SkyHook Components and Kits

SkyHook switch connector tethers to the tool on a short lanyard. SkyDock attachment securely anchors the SkyHook to wrist, belt, or apron.
