

## Parts Washers with Cleaning Solution

- Water-Based (Microbial) solution
- Bioremediation, flush, and manual cleaning method
- Single flushing stations
- Plastic tank material
- Corrosion-resistant

Parts washers are used to keep tools and metal parts clean, so they work more efficiently and have an extended life. They operate by recirculating proprietary cleaning solutions over parts until free of dirt, oil, grease, and corrosion.

**Smartwasher**—300-gph pump cycles immersion-heated solution. Includes FL-4 Ozzyrat multilayer filter to assist in removing contaminants from parts. Temp. Range: 105° to 115°F.

**Walter Surface Technologies**—135-gph pump cycles coil-heated solution. Temp. Range: 104° to 106°F.

## Rectangular Parts Washer Baskets

- Compatible with solvent- and water-based washers

Used within parts washers to hold workpieces, tools, and machine tool components during cleaning. They prevent scratches or damage to the parts washer tank, and ease objects into and out of the parts washer. These baskets feature a mesh body for water and cleaning solution to pass through to soak all surfaces. Baskets with lids help contain small pieces when they go into cleaning tanks.
