Trailer Ball Mounts

To select the correct ball mount you must be sure the total weight of the trailer and its cargo does not exceed the weight capacity of your vehicle.

Ball Mounts attach to the hitch of the tow vehicle and connect to the trailer coupler. If a trailer rides lower or higher than the tow vehicle, a ball mount can be used to make up the difference in height, so they are level for towing.

Ball Mounts with Hitch Ball have multiple trailer balls with different diameters on one shank. Easily switch between ball sizes for different towing jobs, without having to purchase multiple ball mounts.

Gross Vehicle Weight Capacity	Vehicle Class	Ball Shank Diameter	Drop	Rise	Pin Hole to Hitch Ball Distance	Finish	Features	Brand	Item No.
