Pintle Hooks & Hitches

Pintle hooks are paired with lunette rings to create pintle hitches. These hitches allow for flexibility or swivel motion during towing, making them ideal for heavy-duty or off-road towing on rough terrain.

Air Compensated Pintle Hooks absorb shock and reduce movement between towing parts for less wear and tear.

Mounting Plates allow changing the mounting position to accommodate various trailer heights and ensure trailers are level for transport.

Lunette Rings

Rings attach to pintle hooks providing a secure connection to tow vehicles. Creates a flexible two-part pintle hitch - the pintle hook can swivel on the lunette ring to allow movement and turning during towing.
