Water-Based Parts Washers

SmartWasher® bioremediating parts washing systems are conveniently packaged with high-performing, heavy-duty SW4 OZZY JUICE® water-based cleaning/degreasing solution and FL-4 OZZYMAT multilayer filter to remove oil, grease, and other contaminants from parts. The process is designed to help avoid the need to replace cleaning solution, reducing downtime, and to eliminate hauling and disposal of hazardous waste fluid.

Solvent-Based Parts Washers

- All steel construction
- Spring-loaded lids with 165° fire link
- Directional spouts with On/Off control

Washers circulate solvents to remove grease and oil from automotive parts. Filters trap contaminants to extend solvent life. Dyna-Trap filter

bags remove oils and greases from solvent. Only the filter elements are disposed of. Fire links close lids automatically in the event of a fire.
