

Solvent-Based Parts Washers and Chemicals

- Powder-coated steel construction
- 115V/60 Hz

Manual washers feature fusible safety link that closes the lid in event of fire. Deluxe Drum-Mount and Clean-O-Matic washers comply with most freeboard compliance regulations. All units are ETL Certified for U.S. and Canada.

Clean-O-Matic—Provide 3-way cleaning action delivered by directed steam, flush hose, or in-tank agitation. 4KTX1 also includes casters. 4KTX2 is sized for engine blocks, transmissions, and compressors.

Handi-Kleen—Tanks have bottom drains for easy cleanup. 3Z746 work shelf supports parts above fluid level and is removable for access to soak tank. Features flush hose and filter basket.

Solvent Drum Mount—Can be placed at jobsite for on-the-spot cleaning. Proprietary retractable pump reduces lifting height to minimize back strain.

Aqueous—Heated washer converts soak-to-sink and back again for configurations tailored to your needs. Corrosion-resistant construction with thermostatically controlled heat up to 110°F and GFCI protection.

Parts Washer Chemicals

Bio-Circle—Bio-remediating parts cleaners and degreasers safely remove grease, oil, and grime from all steels and most aluminum alloys. Cleaners are nontoxic, VOC-free, and safe on skin.

B'laster—Removes oil, grease, and grime from metals, most plastics, and painted surfaces without leaving any residue.

CRC—Aqueous, industrial-strength degreasing solutions are PH-neutral, VOC-free, noncorrosive, and biodegradable. For parts cleaning in preventative maintenance and repair facilities, industrial manufacturing plants, automotive repair shops, and metal fabrication facilities.

Graymills—Solvents are for cleaning in Graymills parts washers. Biodegradable aqueous cleaners remove organic and inorganic soils including grease, oil, epoxy, paint, plating salt, and rust. Bioremediating aqueous cleaners are pH-neutral to help the microbial process in Graymills parts washers.

Oil Eater—Powerful formulas dissolve grease and grime from almost any surface; feature anticorrosion chemistry.

ZEP—Solvents are safe to use on all metals. They leave a light oil film to protect against rust and corrosion. Solvents with citrus are for extra cleaning power. Recirculating spray wash detergent is for hot vat or recirculating spray wash cabinets.
