Gas-Powered Snow Power Brush/Plow

■ Self propelled

Polar Trec tires and pneumatic support assures outstanding traction and 360° turnability on snow and icy terrain. Attach the included snow blade for dual sweeping/plowing capabilities. Locking differential feature helps keep you on a straight path. Control broom angle, pressure, and speed directly from the steering-mounted panel. Includes an elastic brush cover reinforced with steel to provide additional broom protection. Offers adjustable height and folds for storage.

Snow Blowers and Accessories

- All snow blowers offer a powerful Ariens AX engine

SNOW BLOWERS

Single-Stage—Lightweight, easy to maneuver, and transport. Manual chute rotation and deflector control. Foldable handle bars allow easy storage.

2-Stage Deluxe—3-blade, 14 in steel impeller and auger carve out a 24 to 30 in W path throwing snow up to 60 ft. A dual-belt auger drive continuously sustains engine power directly to the blower head, with no maintenance adjustments required. Feature a heavy-duty cast-iron gear case with alloy steel gears and L-3 severe-duty gear oil. High-performance final drive ratio ensures higher torque at wheels and provides superior traction through deep snow.

ACCESSORIES

Shear Bolt Kits—Intentionally designed to snap if the auger jams or clogs, and will rupture at the designed load limit to protect the auger gear box.

Maintenance Kit—Kit includes 32 oz. of Ariens 5W30 engine oil, replacement spark plug, fuel stabilizer granules, and a spare ignition key.

Composite Skid Shoe Kit—Nonabrasive shoe protects decorative surfaces from snow thrower damage. Kit includes 2 skid shoes and installation hardware.

Snow Blower Covers—Water-repellent, tear- and abrasion-resistant covers can stand up to rugged environments. 6mm bungee around the edges.

Protective Floor Mat—Park snow throwers on the raised-edge mat to help contain melting snow, and to help prevent gas, oil, and rust spots and scratches.

Front Weight Kit—Adds 10 lb. to the front of Ariens snow throwers, to equalize weight distribution and hold the scraper blade closer to the ground to get a cleaner surface. Also enhances operator comfort and control.

Protective Cab—Installs quickly and easily, with no tools required, to protect against heavy snow and wind. Freeze-resistant clear windows. Does not require weight kit.
