Shovel and Handle Types

SHOVEL TYPES

Round and Square

Used for digging and moving materials. These shovels usually have a long, straight handle; giving you more leverage when digging. The larger blade size comes with a pointed or rounded tip and is ideally used

for digging, moving, breaking, and turning soil applications.

Scoop

Primarily used for moving grain material. Feature deeper basin that helps prevent spillage and has a deep enough edge to help snow removal.

Spade

Used for removing material and creating trenches of different shapes. Spades usually have a small, straight, flat blade and a shorter shaft. They are primarily used for slicing, lifting, moving, edging, and loosening soil and roots.

Trench

Similar to spades and are used to dig narrow trenches.

HANDLE TYPES

Come in D-Grip or straight shapes and are made from wood, fiberglass, steel, and aluminum.
