

REESE™ **FULTON™**

Trailer Couplers

Straight-Tongue—Bolt onto trailer tongues for towing. Attach to hitch balls and lock with latches for security.

A-Frame—Couplers are welded onto A-shaped tongues and have latches for secure hookups and disconnections. Commonly used when trailers or campers will be jack supported.

Adjustable—Attach to hitch balls with cam locking pins. Height can be adjusted to ensure proper trailer level for towing.

Gooseneck—Have a self-centering lock plate that fits over hitch balls to engage tow vehicles. Locking handles are accessible from any angle and height can be easily adjusted.
