## Hardware Cloth, Netting, Wire, and Barbless Cable

Galvanized steel construction

### HARDWARE CLOTH AND POULTRY NETTING

**Hardware Cloth**—Welded cloth has a double zinc coating for maximum rust resistance and long life. Can be used as tree guards, window covers, on screen doors, gutters, and more.

**Poultry Netting**—A lightweight containment solution for many maintenance projects. For use in plant protection, animal cages, as a soil erosion inhibitor, and more.

### WIRE AND BARBLESS CABLE

**Electric Fence Wire**—2 wire gauges in different lengths work with most farm voltages.

**Smooth Wire**—Durable, single-strand wire with rust-resistant finish is ideal for bundling, hanging, and tying.

**Barbed Wire**—Can be installed in line or as loose coil. Ideal for agriculture, animal boundary, military and prison protection, and security applications.

**Barbless Cable**—Economical way to control livestock without the entanglement dangers of a barbed wire fence.

## Fence Screens and Scaffolding Netting

Privacy and Debris Screens are durable, lightweight, tear resistant, and easy to install. HDPE screen material will not absorb water. Windscreen is ideal for windy locations and where privacy and security are desired. Screen is easy to install, highly visible, and has wing-type openings that allow air to flow through. Material has horizontal and vertical tear-proof bands for greater stability in windy conditions.

## Fence Posts and Drivers

**Fence Posts**—All fence posts are made of steel. U-Channel posts are compatible with poultry netting and hardware cloth.

**Manual Fence Post Drivers**—Weighted and reinforced steel heads on 4LVN8 and 9ANX7 are constructed for driving steel fence posts, the tapered loop handles offer comfortable hand placement. 3PNJ2 high-strength cap can be used with a post driver to sink sign posts into the ground.

QUICK, EASY, SECURE

## Earth Anchors

Designed to eliminate the need to dig or use concrete to secure your valuable items such as tie down tarps, tents, shelters, and outdoor furniture; or install posts.

## Barrier Fencing

9KDE5 is a UV stabilized fence with oval mesh openings designed to slow wind and create drifts for snow storage so they will not interfere with roadways, driveways, or runways. Strong HDPE plastic resists wind damage and remains flexible in freezing temperatures. Tenax Safety Fence features smooth top and bottom borders that are less likely to cut and scrape adjacent materials during installation and removal. Fences are reusable, lightweight sets providing boundaries around work zones, construction sites, sporting events, and blowing sand, silt, or snow. Also effective for crowd control.
