

## Tree Watering Bags

Slow-release, polyethylene water bags wrap around the tree to provide an efficient means of properly watering newly planted trees or shrubs and promoting deep root growth. Reduces transplant shock by providing a continuous water supply directly to the root system.

Color	Cap.	Drain Time	Max. Tree Dia.	Item No.

<b>Watering Spray Wands</b>							
30 5/16 in L Pro Power Jet Wand with Adjustable Spray	Metal	Trigger	Black/Red	125 psi	100 °F	Gilmour	425X95
16 in Rain Wand w/Foam Grip	Aluminum	Lever	Berry, Green, Red	100 psi	100 °F	Dramm	F2736
32 in L Aluminum Wand with Flow Control Lever Switch	Rezimar Body, Insulated Handle	Trigger	Gray/Yellow	60 psi	100 °F	—	1HLV2

\* Rezimar = metal/polymer blend.

## Pivoting Nozzle Pole

A slide grip pivots the nozzle up to 135° to reach spray into tight spaces and awkward angles. Attaches to your existing garden hose for longer reach and spray patterns from fine mist to high power, 2.5 to 5 gpm. The adjustable nozzle has a rubberized tip to protect surfaces. It can be exchanged with any standard garden hose accessory to use the pole's pivot action and reach. The hose interface spins freely to prevent kinks. Features water/soap mixture control and easy switch to clean water only for rinsing.

Description	L	Item No.
Pivoting Nozzle Pole with Soap Reservoir	38 in	28AF47
