# Rodent Bait Stations and Rodenticides

Bait Stations—Provide a place where rodents feel secure while feeding on poisonous bait. Tamper-resistant designs keep bait out of reach of children, pets, and nontarget animals. Do not require the cleanup of traps and can help monitor rodent activity.

Rodenticides-Pellet packs are for burrow baiting, packs help protect bait and fit in tight spaces. Block baits are for all-weather use and resist mold and moisture. Brodifacoum and Bromadiolone formulas are for single-feed use. Bromethalin acts quickly and is highly palatable to rodents. Diphacinone formula is an economical bait for day-to-day control of recurring rodent problems.
