Snow Throwers and Accessories

■ All snowblowers offer a powerful Ariens AX engine

Single-Stage—Lightweight, easy to maneuver, and transport. Manual chute rotation and deflector control. Foldable handle bars allow easy storage.

2-Stage Deluxe—3-blade, 14" steel impeller and auger carve out a 24" to 30"-wide path throwing snow up to 60 ft. A dual-belt auger drive continuously sustains engine power directly to the blower head, with no maintenance adjustments required. Feature a heavy-duty cast-iron gear case with alloy steel gears and L-3 severe-duty gear oil. High-performance final drive ratio ensures higher torque at wheels and provides superior traction through deep snow.

ACCESSORIES

Shear Bolt Kits—Intentionally designed to snap if the auger jams or clogs, and will rupture at the designed load limit to protect the auger gear box.

Maintenance Kit—Kit includes 32 oz. of Ariens 5W30 engine oil, replacement spark plug, fuel stabilizer granules, and a spare ignition key.

Slicer Bar Kits—Use to cut large drifts and packed snow and direct snow into the auger; rotate bars down and out-of-the-way when not needed. Can be installed without tools.

Composite Skid Shoe Kit—Nonabrasive shoe protects decorative surfaces from snow thrower damage. Kit includes 2 skid shoes and installation hardware.

Snow Thrower Covers—Water-repellent, tear- and abrasion-resistant covers can stand up to rugged environments. 6mm bungee around the edges.

Protective Floor Mat—Park snow throwers on the raised-edge mat to help contain melting snow, and to help prevent gas, oil, and rust spots and scratches.

Front Weight Kit—Adds 10 lb. to the front of Ariens snow throwers, to equalize weight distribution and hold the scraper blade closer to the ground to get a cleaner surface. Also enhances operator comfort and control.

Protective Cab—Installs quickly and easily, with no tools required, to protect against heavy snow and wind. Freeze-resistant clear windows. Does not require weight kit.
